

Senior Consultant for Agro-economics in Cologne

With focus in Food Value Chain and Sustainable Agriculture

ELFIN GmbH is a consultancy company specialized, among others, in agricultural projects, with focus on Food-Value-Chain (from farmer to retailer) and sustainable agriculture. We support all corporate levels of multinational companies in the agricultural sector in the creation and implementation of innovative concepts in the interface between business and agriculture (e.g. traceability systems, collaborative partnerships and marketing, training- and certification concepts). We combine powerful consultancy concepts with agricultural expertise in the Food Value Chain to deliver to our clients effective solutions for growth, increasing profitability and customer satisfaction, and realize them professionally, with expertise and deep sector understanding.

We would like to hire **a graduate** with focus on food-value-chain and practical experience according to your tasks (see below) **as senior consultant** to expand our team in **Cologne as soon as possible**.

Your tasks – You are part of a project team for analysis, conceptualization and implementation of:

- › Business strategies and models
- › Organizational design, business process development and optimization
- › Operational and IT excellence
- › Transformation concepts
- › Sustainable increase of profitability and growth
- › The set-up of business within the food-value-chain

Your profile – Ideally you have:

- › A bachelor/master or degree in agricultural studies finished with good grades
- › Broad business knowledge: strategy, organization, marketing and project management
- › Analytical and problem solving skills
- › Deep understanding of agriculture (fruits & vegetables) and related subjects
- › High motivation, personal responsibility and entrepreneurial approach
- › Strong entrepreneurial mindset
- › Good understanding of IT and excellent knowledge of Excel and Power Point
- › Very good written and spoken English knowledge (International experience or internship, Native speakers also welcomed)
- › Practical work experience in agricultural business economics (min. 3 years)

We offer:

- › Exciting projects in the agricultural sector with focus in food chain management and sustainable agriculture
- › Participation in everyday decisions
- › Multinational companies as customers
- › A friendly corporate culture

If you wish to be a part of our team please send your complete application per email to the following address:
